2022 Community Profile

From the Regional Vice President

Welcome to The Valley Health System, an integrated system of hospitals, freestanding emergency departments, outpatient services, physician practices and health partners. Together, our top priority is to provide the best possible healthcare services, outcomes and experiences to our patients.

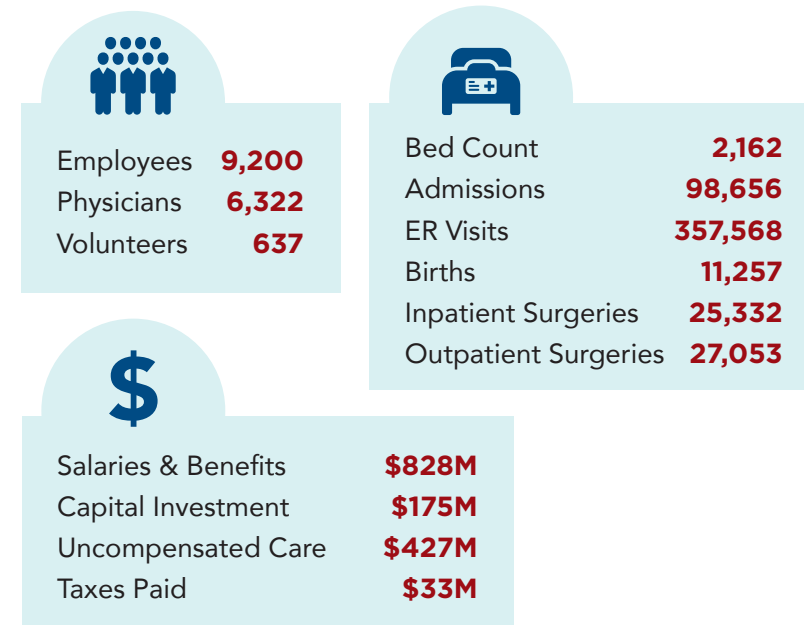

In the pandemic years of 2020 to 2022, I'm very proud we have received numerous quality care awards and added more facilities to increase our community's access to care. But we couldn't do it without the expertise, experience and compassion of our team members, physicians and partners who work tirelessly to improve patients' health, create families, save lives and support family and friends during incredibly difficult moments.

Thank you for entrusting your care to us.

Karla J. Perez
Regional Vice President, Acute Care Division

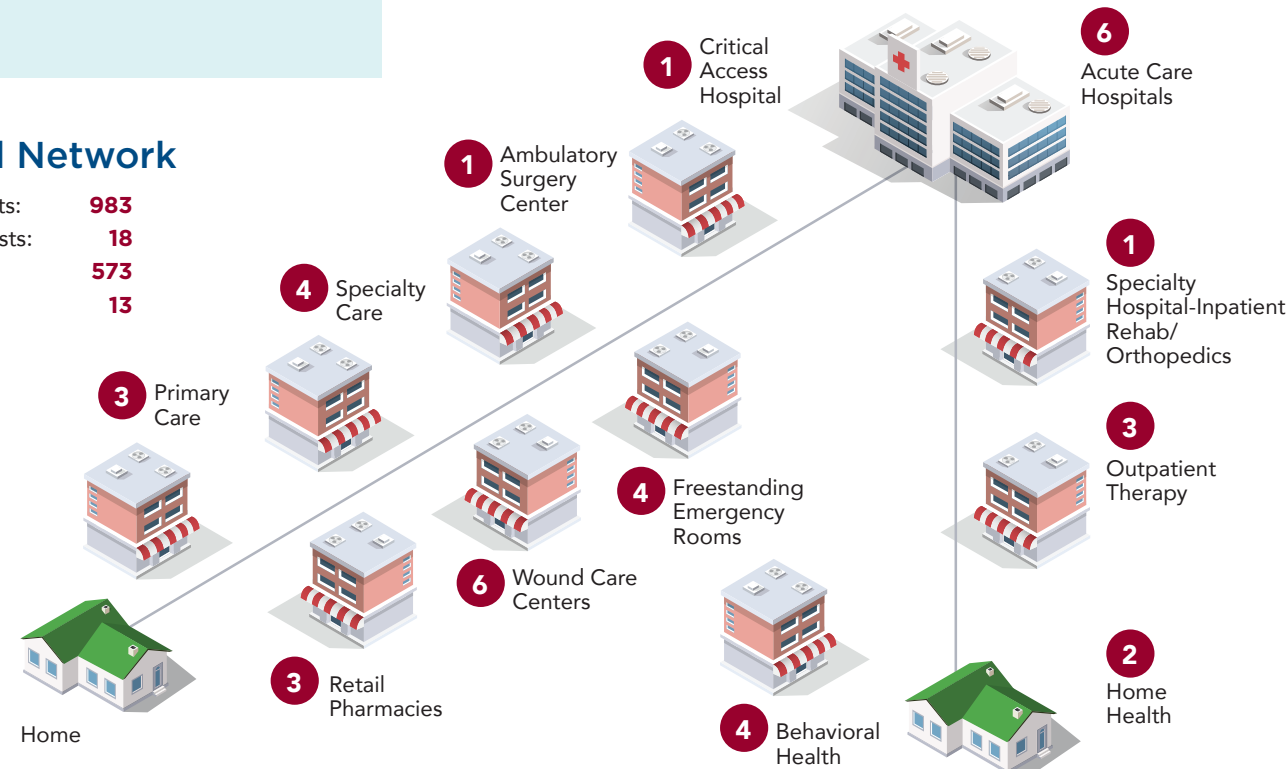

The Valley Health System Boosts Local Economy in 2021

The Valley Health System is proud to contribute to the health of the community and boost the local economy. Our numbers tell our story - we are the largest provider of healthcare services in Southern Nevada. As an esteemed employer, The Valley Health System offers a wide range of rewarding career opportunities, as well as educational support and training for the next generation of healthcare providers, including physicians, nurses, therapists and others in the allied health science programs.

The Valley Health System Milestones

The Valley Health System broke ground on its 7th acute care facility, West Henderson Hospital, which is scheduled to open in mid-2024.

The Valley Health System partnered with BAYADA to launch "Valley Health at Home by BAYADA." The joint venture, part of BAYADA's national strategic partnership with Universal Health Services, Inc., will expand access, spur clinical innovation and mark BAYADA's entry into Nevada.

The Valley Health System acquired Elite Medical Center Las Vegas, a privately owned micro-hospital offering emergency and inpatient care in the heart of the Las Vegas Strip. The newly acquired facility is an extension of Valley Hospital.

Centennial Hills Hospital opened its freestanding emergency department - ER at Valley Vista.

Centennial Hills Hospital earned The Joint Commission Gold Seal of Approval® and the American Stroke Association® Heart-Check mark as a Certified Thrombectomy-Capable Stroke Center.

Desert Springs Hospital was honored as the gold winner in the Best Hospital category of the Las Vegas Review Journal's Best of Las Vegas poll for the second consecutive year. The Surgical Weight Control Center, which is part of the Valley Health Physician Alliance, was also honored as the gold winner in the Weight Loss Center category.

Desert Springs Hospital received its inaugural "A" Leapfrog hospital safety grade, and Henderson Hospital earned its 8th consecutive "A" grade for spring 2022. This national distinction recognizes both hospitals' achievements in protecting patients from preventable harm and error in the hospital.

Henderson Hospital opened four new patient floors in its new tower, expanded its emergency department capacity by 25 beds, opened a 480-space parking garage and earned multiple national patient safety awards and specialized certifications.

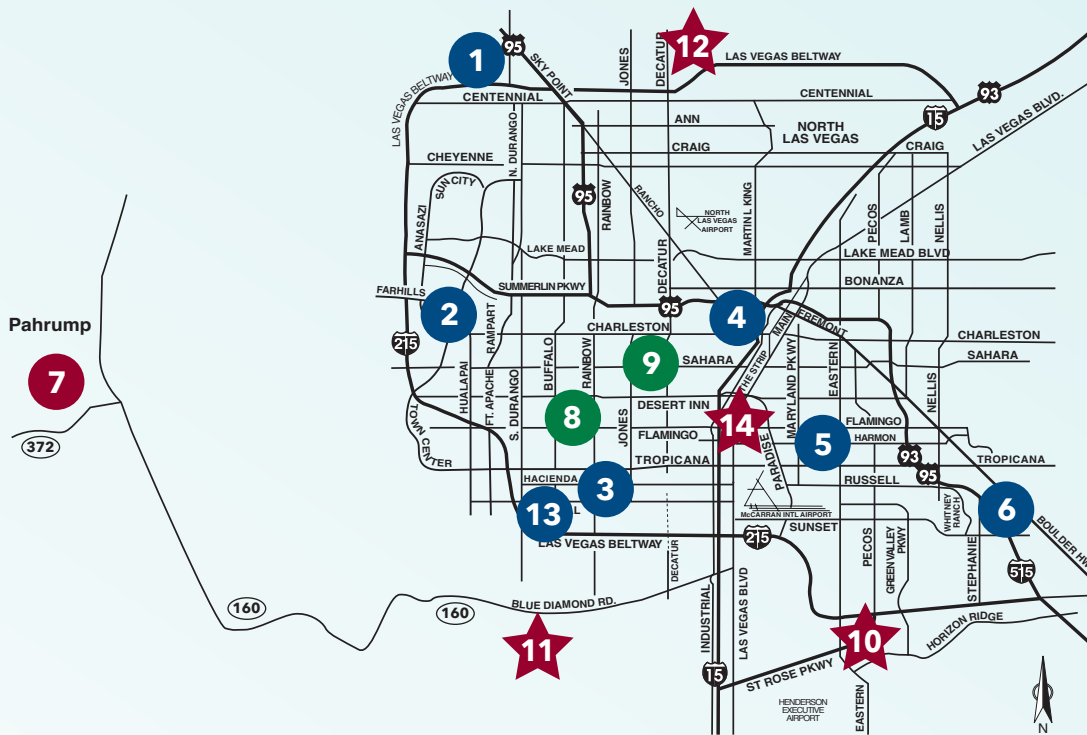

Spring Valley Hospital and its freestanding emergency department are the first two medical facilities in Las Vegas to earn The Joint Commission's Gold Seal of Approval® and the American Stroke Association's® Heart-Check mark for two specialized stroke designations: Certified Thrombectomy-Capable Stroke Center for Spring Valley Hospital and an Acute Stroke Ready Hospital for the ER at Blue Diamond.

Summerlin Hospital was recognized as a high-quality, high-value program by Aetna's Institute of Quality for Cardiac Surgery.

Summerlin Hospital celebrated 12,000 robotic surgery cases.

Valley Hospital turned 50 years old and was rated a High Performing Hospital for Stroke by U.S. News & World Report for 2022-2023.

Valley Health Specialty Hospital, an extension of Spring Valley Hospital, opened for orthopedic surgery and inpatient rehabilitation.
