2021 Community Profile

From the Regional Vice President

Welcome to The Valley Health System, an integrated system of care comprised of eight hospitals, physician practices and a variety of outpatient services. We are proud to be the provider of choice for our friends and neighbors in Southern Nevada. As Nevada's largest healthcare system, we are continually working to address your healthcare needs by providing high-quality care, adding more services and technology, educating your future doctors and nurses, and serving as a resource and partner in your health.

In 2020, our hospitals continued to grow to meet our community's needs. Henderson Hospital opened its Level III Neonatal Intensive Care Unit, providing a high level of specialized care to its tiniest patients. Both Summerlin and Spring Valley hospitals opened new inpatient dialysis suites, offering increased access for dialysis patients. Centennial Hills Hospital added two new labor and delivery suites along with opening 36 mother-baby postpartum suites. The Valley Health System also completed the purchase of the former Orthopedic Specialty Hospital of Nevada. The new facility has undergone renovations and opened in August 2021 as the Valley Health Specialty Hospital. Additionally, The Valley Health System acquired a 40-acre parcel of land in West Henderson to help support the future healthcare needs of the community.

We constantly look for ways to improve your access to the quality care we provide. This takes many forms, including behind-the-scenes actions to improve patient outcomes, the development of graduate medical education residencies and fellowships for physicians, and a continued commitment to expertise in hospital care and specialty designations.

As our facilities and services expand, our commitment to excellence remains steadfast. This past year, several of our facilities received special recognitions for their expertise in healthcare. Desert Springs Hospital was awarded the 2020 Gold Best Hospital by Best® of Las Vegas. Also, Spring Valley Hospital's Birthplace received the 2020 Gold Best Place to Have a Baby and the 2020 Silver Best Hospital award. Valley Hospital's acute inpatient rehabilitation unit received recognition as one of the top 10 percent inpatient rehabilitation facilities in the United States for a second consecutive year. Valley Hospital also became a certified Comprehensive Stroke Center. Henderson Hospital was awarded a fifth, consecutive 'A' grade from The Leapfrog Group. This designation recognizes the hospital's efforts in protecting patients from harm and meeting the highest safety standards in the United States. Henderson also received accolades from The Leapfrog Group as a Top Teaching Hospital. Summerlin Hospital's Inpatient Acute Rehabilitation Program also received the Uniform Data System for Medical Rehabilitation 2020 Top Performer award, recognizing the hospital as being in the top 10 percent of facilities for rehabilitation patient outcomes across the country.

Our hospitals have served the community for more than 40 years. When it comes to providing you quality healthcare, our commitment will always be to remain Safe, Trusted and Ready. Whether it is a lifesaving procedure or providing ongoing care throughout your recovery, we appreciate the opportunity to serve you. On behalf of the employees of The Valley Health System, thank you for choosing to receive care at our hospitals, emergency departments, therapy centers, wound care program, home healthcare service, and through our physician network. We're honored to serve you and committed to providing you with a positive experience each time you come to us for care.

A stylized, handwritten signature in black ink that reads "Karla Perez".

Karla J. Perez
Regional Vice President, Acute Care Division

Your Valley > YOUR CARE

THE VALLEY HEALTH SYSTEM

Since 1979, The Valley Health System has been providing care to the residents of Southern Nevada and the surrounding communities. The Valley Health System is the largest healthcare system in Southern Nevada with a network of seven acute care hospitals, numerous physician practices and a variety of outpatient services.

Valley Health System Overview and History

The Valley Health System has earned a reputation for excellence in providing quality healthcare to residents. The Valley Health System offers comprehensive medical services, including cardiovascular, maternity and women's health, emergency and surgical care, along with specialty programs in chest pain, pediatrics, diabetes, wound care, bariatric surgery, orthopedics, neurosurgery, rehabilitation and behavioral health.

The system achieved significant milestones in 2020, including:

- Centennial Hills Hospital has been recognized by U.S. News & World Report for High Performing in Hip Replacement as part of the Best Hospitals 2020-21 rankings and ratings.
- Desert Springs Hospital was awarded 2020 Gold Best Hospital by Best® of Las Vegas in the Health and Beauty category. Best of Las Vegas is sponsored by the Las Vegas Review-Journal.
- Henderson Hospital was awarded a fifth, consecutive 'A' from The Leapfrog Group. The designation recognizes the hospital's efforts in protecting patients from harm and meeting the highest safety standards in the United States. Additionally, it received a Top Teaching Hospital Award.
- The Birthplace at Spring Valley Hospital was awarded 2020 Gold Best Place to Have a Baby, and Spring Valley Hospital received 2020 Silver Best Hospital by Las Vegas Review-Journal's Best of Las Vegas annual survey.
- Summerlin Hospital's Inpatient Acute Rehabilitation Program received the Uniform Data System for Medical Rehabilitation (UDSMR) 2020 Top Performer Award in recognition of Outstanding Rehabilitation Program Performance. The prestigious honor recognizes Summerlin Hospital as being in the top 10% of facilities for patient outcomes among nearly 900 other inpatient rehabilitation facilities across the country.
- Valley Hospital's acute inpatient rehabilitation unit was recognized as one of the top 10 percent inpatient rehabilitation facilities (IRFS) in the country for a second consecutive year.
- The Valley Health System acquired the former Orthopedic Specialty Hospital of Nevada. The new facility, renamed the Valley Health Specialty Hospital, an extension of Spring Valley Hospital, offers orthopedic surgery, inpatient rehabilitation and outpatient therapy.
- The Valley Health System acquired a 40-acre parcel of land in West Henderson with potential to expand and support the healthcare needs of the community.

DEDICATED TO SERVING MORE PATIENTS WITH HIGH-QUALITY CARE

The Valley Health System increased its capacity to serve more patients with 1,950 beds, 40% of the patient beds in the market.

The Valley Health System provides community outreach programs to the region, including educational programs, Senior Advantage for older adults and fun, interactive health programs dedicated to families. Visit valleyhealthsystemlv.com for information on our health and wellness programs for individuals of all ages.

The Valley Health System is owned and operated by a subsidiary of Universal Health Services, Inc. (UHS). Headquartered in King of Prussia, Pennsylvania, UHS is one of the largest and most innovative healthcare management companies in the nation.

The Valley Health System Boosts Local Economy in 2020

The Valley Health System is proud to contribute to the health of the community and boost the local economy. Our numbers tell our story - we are the largest provider of healthcare services in Southern Nevada. As an esteemed employer, The Valley Health System offers a wide range of rewarding career opportunities, as well as educational support and training for the next generation of healthcare providers, including physicians, nurses, therapists and others in the allied health science programs.

VALLEY HEALTH SPECIALTY HOSPITAL

About Valley Health Specialty Hospital

Valley Health Specialty Hospital serves adults 18 and over by providing specialized orthopedic services, inpatient rehabilitation and physical therapy. We are the first hospital in the area to offer both specialty orthopedics and inpatient rehab in one location. As an extension of Spring Valley Hospital, our service providers leverage the expertise and advanced treatments used at Spring Valley and other hospitals within The Valley Health System network.

Services

Orthopedic Surgery: Our experienced team provides specialized orthopedic services including hip and knee replacement; arthroscopic surgery of the shoulder, elbow, knee and ankle; hand surgery and sports medicine.

Inpatient Rehabilitation: Our extensive inpatient rehabilitation program includes physical, occupational and speech therapy based on the individual needs of the patient. Specialized programs in neurological, spinal and orthopedic therapy are available.

Outpatient Therapy: Outpatient rehabilitation is available for patients looking for ongoing treatment. We have services for those who were injured at work or playing sports, or are recovering from major injury or illness. This includes physical, occupational and speech therapy.

Your Prescription for Convenience

CentRx retail pharmacies at Centennial Hills Hospital, Desert Springs Hospital, Spring Valley Hospital and Summerlin Hospital provide convenience for patients, hospital employees and staff, and the community.

Patients admitted to the hospital are offered free bedside delivery of prescription medications upon discharge. The pharmacies also carry over-the-counter (OTC) products, such as diabetic supplies, cough and cold products, first-aid supplies, beauty items and more. The CentRx Pharmacy page on each hospital's website enables users to request refills online.

DESERT VIEW HOSPITAL

About Desert View Hospital

Desert View Hospital is a 25-bed community hospital located in Pahrump, NV. The team at Desert View is dedicated to delivering quality, compassionate care to residents of the community. As an affiliate of The Valley Health System in Las Vegas, NV, Desert View Hospital has access to a comprehensive, integrated health network that provides advanced specialty care.

Services

Emergency Services: Desert View Hospital has 24-hour emergency care available to residents and visitors to Nye County. Patients that may require a higher level of care will be stabilized and transferred via ambulance or helicopter to a facility that can provide advanced, specialized services as needed.

Cardiopulmonary Care: With licensed respiratory therapists, Desert View provides a range of heart and lung inpatient and outpatient services.

Ancillary Programs: Inpatient and outpatient laboratory, radiology, therapy and wound care services are available to patients, including general hematology, limited blood banking, physical and occupational therapy, X-ray, colonoscopy, orthopedic surgery, ultrasound, bone density and mammography and specialty care for chronic, non-healing wounds.

Centennial Hills HOSPITAL MEDICAL CENTER

About Centennial Hills Hospital Medical Center

Centennial Hills Hospital Medical Center is an eight story, 336-bed facility in the northwest, serving both the Las Vegas and North Las Vegas communities.

We are committed to providing quality care, including maternity, cardiology, surgical, critical and 24/7 emergency care.

Dedicated to the Community

Centennial Hills Hospital Medical Center supports a number of nonprofit organizations including the American Heart Association®, March of Dimes®, United Way of Southern Nevada and the YMCA® of Southern Nevada. Employees also volunteer their time to benefit a wide range of healthcare, civic and community-based organizations.

Community Involvement

Centennial Hills Hospital Medical Center offers annual health fairs in Northwest Las Vegas. During these events, visitors take advantage of free screenings, which may include cholesterol, glucose, bone density and child

obesity screenings. In addition, the hospital offers an annual free Teddy Bear Clinic, which helps to educate kids about what happens in the facility. Our staff also provide free monthly blood pressure checks and educational seminars at area YMCA's, senior centers and master-planned communities such as Sun City Aliante and Skye Canyon. Wellness education and information are also available.

Education

Centennial Hills Hospital helps educate the next generation of nurses in the Las Vegas area. Nurses at Centennial Hills Hospital mentor the nursing students, teaching them both clinical skills and caring practices as they work with patients.

Centennial Hills Hospital offers the community comprehensive classes in childbirth education and CPR. The hospital also hosts adult health and wellness luncheons for the community to learn more about living a healthy lifestyle.

Centennial Hills Hospital Boosts Local Economy in 2020

Centennial Hills Hospital is proud to contribute to the health of the community and boost the local economy. Our numbers tell our story - we are a leader in medical care serving a large portion of the community we serve and performing a significant number of newer and highly sophisticated procedures. As a local employer, Centennial Hills Hospital offers rewarding career opportunities.

Centennial Hills Hospital 2020 Milestones

Centennial Hills Hospital acquired the newest GE OEC Elite with a 12" image intensifier. The new unit is designed to enhance surgical efficiency while delivering superb image quality.

U.S. News & World Report recognized Centennial Hills Hospital as High Performing in Hip Replacement as part of the Best Hospitals 2020-21 rankings and ratings. The annual Best Hospitals rankings and ratings are designed to assist patients and their doctors in making informed decisions about where to receive care for challenging health conditions or for common elective procedures.

Construction was completed on a 36-bed medical/surgical unit for patients who need medical/surgical and intermediate-level medical care. Also, Centennial Hills Hospital added two new labor and delivery suites and an additional 36 postpartum suites to its Birthplace for new mothers and families.

Centennial Hills Hospital completed construction on a new Cath Lab with ARTIS icono system. ARTIS icono offers groundbreaking technology in a flexible, multi-axis system. Its easy-to-use, adaptable design supports improved utilization and growth for all types of procedures and patients.

Centennial Hills Hospital Specialty Services

Emergency Department

The Centennial Hills Hospital emergency department is designated as a Chest Pain Center with PCI by the Society of Cardiovascular Patient Care, and a Primary Stroke Center by The Joint Commission. The emergency department offers a fast track for minor injury or illness. Centennial Hills Hospital makes ER care easier, thanks to ER wait times online and ER Reserve*, which allows patients to request a time in the ER up to 12 hours in advance if they have a non-life-threatening injury or illness. Then they can wait in the comfort of their home until the requested time.

Neurosciences/The Stroke Center

Accredited as an Advanced Primary Stroke Center by The Joint Commission, Centennial Hills Hospital provides a comprehensive program supported by both neurologists and neurosurgeons. The Stroke Center offers patients a range of specially designed services and treatment programs that focus on education, prevention, intervention and active stroke management through a multidisciplinary medical team. The facility also is the first hospital to offer neuro-interventional services in the northwest to treat patients with aneurysm and other advanced neurological conditions.

Orthopedics

The orthopedic staff at Centennial Hills Hospital provide comprehensive care for total knee and hip replacement,

spinal surgery, sports medicine and other orthopedic procedures. The hospital has a dedicated nursing unit for postoperative care and is supported by a dedicated orthopedic nurse practitioner.

Surgical Specialties

Centennial Hills Hospital is the first hospital in the city to have the Stryker Makoplasty® robot to perform advanced total hip and partial knee procedures. The facility also has the first Medtronic O-arm in the state to help provide real-time intraoperative imaging for complicated neurosurgical and spine cases. Additionally, the facility uses two daVinci® Xi surgical systems to support advanced, robot-assisted surgery for gynecology, urology and general surgery procedures.

Women's and Children's Services

The hospital has a comprehensive program including 73 postpartum beds, 12 labor and delivery beds, two C-section suites and a 15-bed Level II/III NICU services unit. The hospital also supports midwife deliveries, and offers childbirth and parenting classes.

Wound Care

This center provides outpatient services for patients with non-healing wounds, offering a variety of treatment services including hyperbaric oxygen therapy.

*ER Reserve should be used only if you decide your care can wait until the time you select. Do not wait if your symptoms or conditions worsen or if you need immediate care immediately since delays may complicate your condition. If you are unsure of your condition or if your condition worsens, then please go to the nearest emergency room or call 9-1-1.

Some insurance plans may not cover an ER visit if it is deemed urgent care or may apply a different copay. Please check your covered benefits with your insurance provider for details.

Desert Springs HOSPITAL MEDICAL CENTER

About Desert Springs Hospital Medical Center

Desert Springs Hospital Medical Center opened in 1971 and provides 24-hour emergency services. It features a designated area in the emergency department to treat patients with less serious injuries and illnesses. The hospital has long been referred to as “*The Heart Hospital*” by residents, due to its solid reputation as a leader in cardiac care. The hospital is nationally recognized for its diabetes, cardiac, stroke and bariatric surgery programs.

Desert Springs Hospital offers specialty geropsychiatric services. The dedicated unit has 32 beds for seniors, ages 55 and older. In addition, the hospital has a 12-bed inpatient acute rehabilitation unit for patients recovering from stroke, surgery or a variety of injuries. Our outpatient cardiac and pulmonary rehabilitation programs are for patients recovering from severe cardiac events or chronic lung diseases.

At Desert Springs Hospital ER care is easier thanks to ER wait times online and ER Reserve* that allows patients to request a time in the ER up to 12 hours in advance if they have a non-life-threatening injury or illness. Then they can wait in the comfort of their home until the requested time.

Dedicated to the Community

Desert Springs Hospital Medical Center supports a number of nonprofit organizations, including American Heart Association®, United Way of Southern Nevada, American Diabetes Association®, Henderson Chamber of Commerce, Las Vegas Chamber of Commerce and Nevada Diabetes Association. Employees also volunteer their time to benefit a wide range of healthcare, civic and community-based organizations. As part of its quarterly Service Excellence celebration, the hospital selects a local charity to support.

Community Involvement

Desert Springs Hospital offers an annual Diabetes Health Fair. Thousands of community residents attend and receive free screenings and health, wellness and diabetes information.

Education

Desert Springs Hospital is committed to educating the community about a variety of health issues. The hospital's initiatives include its inpatient and outpatient Nutrition and Wellness programs for diabetics. Other programs are in place, such as bariatric education, and support groups for those with weight-loss issues and those who have had a stroke.

*ER Reserve should be used only if you decide your care can wait until the time you select. Do not wait if your symptoms or conditions worsen or if you need immediate care since delays may complicate your condition. Desert Springs Hospital 2020 Milestones

New surgical suites were opened at Desert Springs Hospital, offering a safer workflow for staff and patients. The new suites also have more square footage in each room and are mirror images of each other, allowing for greater flexibility in scheduling.

Desert Springs Hospital was awarded 2020 Gold Best Hospital by Best® of Las Vegas in the Health and Beauty category. Best of Las Vegas is sponsored by the Las Vegas Review-Journal.

Desert Springs Hospital Specialty Services

Cardiac Care Institute

The Cardiac Care Institute features open-heart surgery and peripheral vascular services. The Chest Pain Observation Unit was the first in Nevada to be nationally recognized by the Society of Chest Pain Centers.

Desert Springs Hospital's complete cardiovascular services include a cardiopulmonary laboratory, three catheterization labs, tilt table technology, cardiac surgery, inpatient cardiac rehabilitation and the Cardiac Progressive Care Unit – a dedicated care unit for cardiac patients.

The hospital's electrophysiology lab is home to the region's first Stereotaxic Epoch™ Solution for cardiac ablation procedures.

Center for Surgical Weight Loss*

Desert Springs Hospital offers gastric sleeve and bypass procedures, as well as education and support groups. The Center has been designated as a fully accredited Bariatric Center by the Metabolic and Bariatric Surgery Accreditation and Quality Improvement Program (MBSAQIP). The hospital offers support through the entire weight-loss surgery process, from pre-op education to post-op support.

Diabetes Treatment Center

Nationally Recognized by the American Diabetes Association® and the American Association of Diabetes Educators, the Diabetes Treatment Center can help adults with all types of diabetes. The Center offers comprehensive inpatient and outpatient care, education and treatment.

Providing services in English and Spanish, the Center's programs include diabetes self-management education, gestational diabetes education, continuous glucose monitoring and acute care during hospitalization.

Desert Springs Hospital's program was the first inpatient diabetes program in the United States to earn a Certificate of Distinction for Advanced Inpatient Diabetes Care from The Joint Commission.

Surgical Specialties

Desert Springs Hospital offers a range of surgical specialties, including open-heart, orthopedics, spine, colorectal, urology, and general surgery, breast, bariatric, thoracic and vascular procedures. Following surgery, patients recover in a post-surgical unit where specialty trained nurses assist them in their recovery.

Wound Care

The hospital offers advanced wound care and hyperbaric medicine to patients with non-healing wounds. Highly skilled medical professionals investigate, analyze and then develop an individualized treatment plan for wound healing.

*Individual results may vary. There are risks associated with any surgical procedure. Talk with your doctor about these risks to find out if bariatric surgery is right for you.

Henderson HOSPITAL

Henderson Hospital is the sixth acute care hospital in The Valley Health System. The 170-bed facility offers area residents comprehensive medical and surgical services, including specialties in emergency care, childbirth services, orthopedics, advanced wound care and cardiac care.

Henderson Hospital makes ER care easier thanks to ER wait times online and ER Reserve* that allow patients to request a time in the ER up to 12 hours in advance if they have a non life-threatening injury or illness.

Henderson Hospital Features

Emergency services are offered 24/7 and include fast triage for non-life-threatening urgent care. Patients can turn to Henderson Hospital for inpatient and outpatient general surgery.

Women's and children's services include maternity care and a new Level III Neonatal Intensive Care Unit (NICU) to care for the hospital's smallest patients.

Cardiology services are offered, as well as radiology, laboratory services, respiratory services and an inpatient pharmacy.

ER at Green Valley Ranch is an extension of Henderson Hospital and is located at 2581 Saint Rose Parkway. The facility is open 24 hours a day and features eight treatment rooms and three rapid exam rooms, along with advanced diagnostic and imaging, CT, ultrasound and X-ray equipment. Board-certified emergency medicine physicians and emergency-trained nurses staff the center.

Committed to Sustainability

Henderson Hospital incorporates 100 percent LED technology for lighting. Compared to traditional energy efficient fluorescent lighting, the new technology results in a 50 percent savings for light energy. This results in an annual savings of over 700,000 kilowatt-hours, eliminating over one million pounds of greenhouse gases and more than \$700,000 on the annual electricity bill.

Henderson Hospital 2020 Milestones

Henderson Hospital completed a 25-bed Observation Unit adjacent to its Emergency Department that will allow greater patient throughput within the facility.

The hospital broke ground on a new, six-floor patient tower that will expand medical/surgical capacity, women's services, and NICU.

Henderson Hospital received multiple program certifications to include Certified Level III NICU, became a TJC Primary Stroke Center, and became an LVO Stroke Certified Center.

For the fifth, consecutive time, Henderson Hospital received an 'A' from The Leapfrog Group. The designation recognizes the hospital's efforts in protecting patients from harm and meeting the highest safety standards in the United States. Additionally, it received honors as a Top Teaching Hospital.

Henderson Hospital Specialty Services

Cardiovascular Services

Henderson Hospital provides cardiovascular care for patients on an emergency and non-emergency basis. The cardiac catheterization lab offers advanced technology to help diagnose and treat heart disease. Certified by the American College of Cardiology as an Accredited Chest Pain Center with percutaneous coronary intervention (PCI), the hospital is equipped to deliver rapid treatment to patients with signs of possible heart attack.

Neurology/Stroke Services

The neurology staff at Henderson Hospital is specially trained to treat patients with symptoms of possible stroke – when minutes matter. The hospital received the 2020 American Heart Association/American Stroke Association Gold Plus Stroke Award in recognition for meeting strict national standards in stroke care.

Orthopedics

The orthopedic professionals at Henderson Hospital provide a spectrum of care, including total knee and hip replacement, spinal surgery, sports medicine, minimally invasive surgical options and more. The hospital earned certificates of The Joint Commission's Gold Seal of Approval® in Joint Replacement Hip and Knee.

Women's and Children's Services

The Birthplace is the star of the hospital's Women's and Children's Services department. The maternity unit features intimate labor/delivery and recovery suites, a family-sensitive atmosphere and Level III Neonatal Intensive Care Unit (NICU) for our tiniest patients in need of extra special care. Henderson Hospital also offers childbirth and parenting classes.

Wound Care

The Wound Care and Hyperbaric Center at Henderson Hospital provides outpatient services for patients with non-healing wounds. The Center offers a variety of treatment options, including hyperbaric oxygen therapy (HBOT).

Spring Valley HOSPITAL MEDICAL CENTER

About Spring Valley Hospital Medical Center

In 2003, Spring Valley Hospital Medical Center was the first acute care hospital to open in southwest Las Vegas. We are proud to have grown alongside our community. The hospital has developed comprehensive services to meet the needs of area residents and visitors. This includes 24-hour emergency services, cardiology services with open-heart surgery, maternity services, inpatient and outpatient rehabilitation, surgical services with the latest robotic technology, a neuro/stroke program with neurosurgery and an advanced wound care center with hyperbaric treatment.

Spring Valley Hospital was the first hospital in southwest Las Vegas to become a certified Chest Pain Center and an Advanced Primary Stroke Center. It is also the only hospital in southwest Las Vegas to offer a Level III NICU, neuro-coiling and thrombectomy for large vessel occlusion, a limb salvage program and an inpatient acute rehabilitation program. It is also proud to be The Valley Health System's first and only facility with a hybrid OR and TAVR program.

Dedicated to the Community

Spring Valley Hospital supports a number of nonprofit organizations, including the local chapters of American Heart Association®, American Diabetes Association® and American Lung Association® as well as United Way of Southern Nevada, Opportunity® Village and Nevada Donor Network.

Community Involvement

As part of creative outreach efforts, Spring Valley Hospital provided items for car parades with area home organizations and hosted a festive car parade in lieu of its annual neonatal intensive care reunion.

Our employees are proud to support the annual school supply drive for Frank Kim Elementary School and a Socks and Gloves drive for the Las Vegas Rescue Mission.

Education

Spring Valley Hospital offers comprehensive childbirth education, and adult health and wellness luncheons to educate the community.

The hospital has affiliation agreements with UNLV, Roseman University, College of Southern Nevada, Las Vegas College, Chamberlain University, Nevada State College, Nightingale College and Arizona College offering clinical rotation opportunities to nursing and allied healthcare students.

Spring Valley Hospital Boosts Local Economy in 2020

Spring Valley Hospital is proud to contribute to the health of the community and boost the local economy. Our numbers tell our story - we are a leader in medical care serving a large portion of the community we serve and performing a significant number of newer and highly sophisticated procedures. As a local employer, Spring Valley Hospital offers rewarding career opportunities.

Spring Valley Hospital 2020 Milestones

Spring Valley Hospital expanded its cardiovascular services by offering MitraClip™ Procedure. One of only three hospitals in southern Nevada performs Transcatheter Mitral Valve Repair (TMVr) with MitraClip therapy – a less-invasive treatment option for patients suffering from mitral regurgitation who are not candidates for open-heart surgery.

Spring Valley Hospital opened a new inpatient dialysis suite set up to dialyze up to four patients at a time. The new suite offers more efficient and timely service for patients.

The hospital installed a new 128-slice CT Scanner. The new scanner features innovative, low-dose, high-resolution technology, faster image scanning along with advanced applications for Neuro Profusion, Cardiac CTA, and enhanced musculoskeletal imaging.

The Birthplace at Spring Valley Hospital was awarded 2020 Gold Best Place to Have a Baby, and Spring Valley Hospital received the 2020 Silver Best Hospital by the Las Vegas Review-Journal's Best of Las Vegas annual survey.

Spring Valley Hospital Specialty Services

In addition to offering cardiac services with open-heart surgery and a hybrid OR, Spring Valley Hospital is home to the Birthplace with a separate entrance for expectant mothers and the only Level III NICU in southwest Las Vegas. Other specialty services include:

Emergency Services

Spring Valley Hospital is designated as a Chest Pain Center with PCI by the American College of Cardiology, and a Primary Stroke Center by the American Heart Association®. As a designated cardiac (STEMI) receiving center, Spring Valley Hospital's emergency cardiac treatment times are among the fastest in Clark County.

The hospital also offers a fast track for minor illness and injury. Spring Valley Hospital makes ER care easier thanks to ER wait times online and ER Reserve* that allows patients to request a time in the ER up to 12 hours in advance if they have a non-life-threatening injury or illness. Then they can wait in the comfort of their home until the requested time.

The ER at Blue Diamond is located at Blue Diamond and Cimarron in the Southwest. The 24-hour facility features eight treatment rooms and is an extension of Spring Valley Hospital.

Neurosciences/The Stroke Center

Accredited as an Advanced Primary Stroke Center, Spring Valley Hospital's Neurosurgeons and Interventional Radiologists have the ability to perform complex neurosurgery and endovascular procedures, including clot retrieval for large ischemic strokes.

Spring Valley Hospital's team of specially trained neurology, neurosurgery and stroke experts focus on the prevention, diagnosis and treatment of disorders that affect the nervous system including the brain, spine and peripheral nerves.

Surgical Specialties

Open-heart surgery is performed in surgical suites specially designed to provide surgical teams with the most ideal environment possible. Spring Valley Hospital uses advanced robotic surgery technology with the da Vinci® Xi HD™ Surgical System, with Single-Site® surgery available for gynecology, urology, prostate and general surgery.

*ER Reserve should be used only if you decide your care can wait until the time you select. Do not wait if your symptoms or conditions worsen or if you need immediate care since delays may complicate your condition. If you are unsure of your condition or if your condition worsens, then please go to the nearest emergency room or call 9-1-1. Some insurance plans may not cover an ER visit if it is deemed urgent care or may apply a different copay. Please check your covered benefits with your insurance provider for details.

Summerlin HOSPITAL MEDICAL CENTER

About Summerlin Hospital Medical Center

Located in a premier master-planned community, Summerlin Hospital Medical Center is one of the largest and most comprehensive healthcare facilities in southern Nevada. Serving the community for more than 20 years, the hospital provides residents with the services of The Cancer Center, The Children's Medical Center, The Heart Center and the BirthPlace for Women and Children, and Summerlin Hospital's Robotic Surgery Center, featuring the da Vinci® Xi Surgical Systems. These services and others represent our continuing pursuit of medical innovation.

Dedicated to the Community

Summerlin Hospital Medical Center supports a number of nonprofit organizations, including the American Heart Association®, United Way of Southern Nevada, March of Dimes®, Nevada Childhood Cancer Foundation, Candlelighters™ Cancer Foundation, Nevada Hospital Association and American Lung Association, and the hospital works with several local oncology support groups.

Employees also volunteer their time to benefit a wide range of healthcare, civic and community-based organizations.

Community Involvement

Summerlin Hospital offers an annual Cancer Fair that includes free health screenings and wellness education. The hospital also hosts a free Teddy Bear Clinic each year for school-age children. The Teddy Bear Clinic is designed to help educate kids about what happens in the hospital.

Education

The BirthPlace provides the community with comprehensive childbirth education, as well as health and wellness lectures.

Summerlin Hospital Boosts Local Economy in 2020

Summerlin Hospital is proud to contribute to the health of the community and boost the local economy. Our numbers tell our story - we are a leader in medical care serving a large portion of the community we serve and performing a significant number of newer and highly sophisticated procedures. Summerlin Hospital 2020 Milestones

Summerlin Hospital added Electromagnetic Navigation Bronchoscopy (ENB) to its list of services. ENB enables physicians to examine and treat areas in the lungs that are inaccessible with regular bronchoscopy.

The new Biosense Webster® CARTO 7 PRIME® software was added to Summerlin Hospital's Cardiac Cath Lab. The CARTO 7 PRIME upgrade will allow for more accurate mapping and understanding of complex arrhythmias. Summerlin Hospital is the first lab in the Las Vegas market to have the technology for physicians and patients.

Summerlin Hospital acquired the NuVasive LessRay® system, which allows surgeons to see fluoroscopy images with greater definition and enhancement than has ever been available while in low-dose CT settings, using up to 75% less radiation compared to standard fluoroscopy.

Summerlin completed construction on a new inpatient dialysis suite. The new unit will increase dialysis access to inpatients.

Summerlin Hospital's Inpatient Acute Rehabilitation Program received the Uniform Data System for Medical Rehabilitation (UDSMR) 2020 Top Performer Award in recognition of Outstanding Rehabilitation Program Performance. The prestigious honor recognizes Summerlin Hospital as being in the top 10% of facilities for patient outcomes among nearly 900 other inpatient rehabilitation facilities across the country.

Summerlin Hospital Specialty Services

Cardiovascular Services

Summerlin Hospital offers a range of advanced cardiovascular services including surgery for patients who need specialized interventional cardiac procedures or open-heart surgery. The hospital's Electrophysiology Lab enables cardiac specialists to identify arrhythmia and heart disturbances and perform radiofrequency ablations to help faulty electrical signals in the heart. Summerlin Hospital has a dedicated cardiac rehabilitation program to help patients recover following surgery.

Children's Medical Center at Summerlin Hospital

The renowned Children's Medical Center at Summerlin Hospital provides advanced care to infants, children, adolescents and teenagers from all over the Las Vegas Valley. Along with the general Pediatric Unit, the Pediatric Intensive Care Unit and Pediatric ER, the Medical Center provides a broad array of advanced services – close to home.

The unit features an animal theme with custom artwork in each of the unit's 45 private patient suites depicting a different animal for each patient room. The Children's Medical Center also provides a Level III Neonatal Intensive Care Unit (NICU) with advanced technology to care for the tiniest patients.

Emergency Department

Summerlin Hospital is a nationally accredited Chest Pain Center with PCI by the American College of Cardiology.

The emergency department is designed for air ambulance services, with a helipad located just steps from the emergency room. Summerlin Hospital also practices Early Heart Attack Care (EHAC). The department is home to a dedicated Pediatric ER with a separate entrance.

ER Just Got Easier at Summerlin Hospital. Wait times are available online and ER Reserve* is available so patients can request a time in the ER for non-life-threatening illness and injury.

Oncology Services

Summerlin Hospital's Cancer Center provides compassionate, patient and family-centered care, from a staff dedicated to providing advanced cancer treatment and support services. Adults and children who have cancer can get the specialized medical care they need from a multidisciplinary team of medical professionals. The hospital offers support groups for patients and loved ones affected by breast and bladder cancers.

Women's Services

Summerlin's women's health program offers a comprehensive range of services including maternity care, mammography and breast procedures, gynecological surgery and bone density testing.

*ER Reserve should be used only if you decide your care can wait until the time you select. Do not wait if your symptoms or conditions worsen or if you need immediate care since delays may complicate your condition. Valley HOSPITAL MEDICAL CENTER

About Valley Hospital Medical Center

Located in the Las Vegas Medical District, Valley Hospital has been caring for residents and tourists for more than 40 years. The hospital offers 24/7 emergency care, and is designated as an Advanced Comprehensive Stroke Center by The Joint Commission and as a Chest Pain Center with PCI by the American College of Cardiology for its rapid diagnosis, intervention and treatment of strokes and cardiac issues, such as heart attacks.

As a tertiary facility, Valley Hospital offers advanced cardiac services, such as open-heart surgery, balloon angioplasty and cardiac catheterizations. Its neurosciences program offers a wide range of services, including stroke care, neurosurgery, interventions such as coiling for brain aneurysms and an inpatient acute rehabilitation unit to help patients recover from traumatic injuries, stroke and other diseases.

A variety of surgeries are also performed within its 11 surgical suites. In addition to cardiac and neurosurgeries, other specialties include abdominal, bladder/kidney/prostate, spine, oncology, orthopedic, colorectal, vascular and general surgery. A variety of endoscopic procedures are also performed within the surgery division.

Valley Hospital offers several key outpatient services, including a wound healing and hyperbaric medicine center to address hard-to-heal wounds.

Dedicated to the Community

Valley Hospital supports a number of nonprofit organizations including the American Heart Association® and the United Way of Southern Nevada. Employees also volunteer their time to benefit a wide range of healthcare, civic and community-based organizations.

Education

Valley Hospital offers a Graduate Medical Education program (accredited by ACGME) in the areas of internal medicine, family medicine, neurology and orthopedic surgery. The hospital also offers a traditional internship program, along with fellowships in gastroenterology and pulmonary/critical care. Hospital employees also serve as clinical preceptors for students in nursing, therapy, pharmacy, dietary and emergency medical services (EMT) programs.

Valley Hospital is also home to a Pharmacy Residency program and over 600 multidisciplinary clerkship and internships offered annually, focusing on evidence-based clinical pathways that research has shown to be effective with most patients.

Valley Hospital Boosts Local Economy in 2020

Valley Hospital is proud to contribute to the health of the community and boost the local economy. Our numbers tell our story - we are a leader in medical care serving a large portion of the community we serve and performing a significant number of newer and highly sophisticated procedures. Valley Hospital 2020 Milestones

For partial and total knee replacement surgery, Valley Hospital is the first in southern Nevada to acquire the CORI™ Surgical System. This completely portable, handheld proprietary robotic-assisted technology features CT-free registration and patient-specific planning for precise implantation.

Valley Hospital is the first in Nevada to treat and prevent future strokes by using a new procedure called Trans-Carotid Artery Revascularization (TCAR). TCAR is a clinically proven, minimally invasive and safe approach for high-surgical-risk patients who need carotid artery treatment.

Valley Hospital's acute inpatient rehabilitation unit has been recognized as one of the top 10 percent inpatient rehabilitation facilities (IFRS) in the United States for a second consecutive year.*

Valley completed the construction and remodel of the admitting entrance and Emergency Department triage. Along with new finishes, a fresh color palette and new windows were added for natural light. The refresh offers our patients, visitors and staff a welcoming, open environment.

Source: Uniform Data System for Medical Rehabilitation (UDSMR)

Valley Hospital Specialty Services

Behavioral Health Services

Valley Hospital offers inpatient behavioral healthcare for adults ages 18 to 64.

Psychiatrists, nurses, social workers, activity therapists and mental health technicians focus on developing customized interdisciplinary treatment plans that meet each patient's needs. An attending physician will evaluate each patient's need for medication, and will discuss medications with the patient and appropriate family members before treatment begins. Individual, group and family therapy are available.

Emergency Department

Valley Hospital is designated as a Primary Stroke Center by The Joint Commission and as a Chest Pain Center with PCI by the American College of Cardiology. A rapid medical evaluation area is also included. Plus, ER Just Got Easier at Valley Hospital. Wait times are available online and ER Reserve* is available so patients can request a time in the ER for non-life-threatening illness and injury.

Neurosciences/The Stroke Center at Valley Hospital

Established as an Advanced Comprehensive Stroke Center by The Joint Commission and the American Heart and Stroke Association in 2020, Valley Hospital's neurosciences program continues to grow. Neurosurgeons and interventional radiologists have the ability to perform complex neurosurgery and endovascular procedures. The biplane angiography suites are used to treat intracranial aneurysms and carotid disease.

The program includes interventional radiology services, an inpatient acute rehabilitation unit and a neurology residency for physicians.

Surgery

Valley Hospital surgeons and staff work closely together to provide an optimal surgical experience for all patients and their family members. Among the surgeries performed at the hospital are abdominal bladder/kidney/prostate, breast, cardiac, colorectal, da Vinci® robotic, gynecological, oncology, neurosurgery, orthopedics, spine, vascular and general surgeries.

The surgical department is home to 32 all-private surgical post-op rooms on a newly renovated nursing unit. The department also boasts an 18-bed surgical preparation area and a 20-bed post-anesthesia care unit.

*ER Reserve should be used only if you decide your care can wait until the time you select. Do not wait if your symptoms or conditions worsen or if you need immediate care since delays may complicate your condition. Expansion Projects

The Valley Health System completed the purchase of the former Orthopedic Specialty Hospital of Nevada. The new facility has undergone renovations and opened in August 2021 as the Valley Health Specialty Hospital, an extension of Spring Valley Hospital. Additionally, The Valley Health System acquired a 40-acre parcel of land in West Henderson that would support the future healthcare needs of the community.

Centennial Hills Hospital completed construction on a 36-bed medical surgical unit for patients who need medical/surgical and intermediate-level medical care. The hospital also added two new labor and delivery suites and an additional 36 postpartum suites to its Birthplace for new mothers and families.

Desert Springs Hospital added new surgical suites with more square footage in each room and are mirror images of each other allowing for greater flexibility in scheduling.

Spring Valley Hospital opened a new inpatient dialysis suite. The new suite offers more efficient and timely service for dialysis patients.

Henderson Hospital completed a 25-bed Observation Unit and broke ground on a new, six-floor patient tower that will expand medical/surgical capacity, women's services and NICU.

Summerlin Hospital completed construction on a new inpatient dialysis suite offering increased dialysis access for patients.

Valley Hospital completed construction and remodel of the hospital's admitting entrance and Emergency Department triage area.
